

# SIX cheap and cheerful ways to cut home energy costs...

## 1. Block all draughts

Buy some draught excluders or even make your own draught excluding snake!

## 2. Keep warm

Wear warm woollens, put blankets on the bed and turn down heating at night.

## 3. Switch the lights off

Turn off when you don't need them. Use every available bit of daylight. So cut back that hedge or clean that window.

What can YOU do tonight to help reduce your energy bills?

Get crafty!  
Get knitting!  
Get sewing!

## 4. Switch devices off at wall

Don't allow 'vampire energy' to suck on your hard-earned cash! Switch the washing machine, computer or mobile phone off at the socket.

## 5. Close curtains

Make your own extra thick curtains that fit windows ...keeping the warmth in.

## 6. Eat meals together

Cook dinner once to share with family and friends. Saving energy can be fun too!
